~~Someone sends this in chat what do you do? *~~

I would mute them for a day and delete the message(s)

Staff comment: No, we always try to warn the player before muting them

~~A user sends NSFW (such as porn, graphic images etc.) What do you do. *~~

Say "This is not an NSFW server" and ban them

Staff Comment: This question has been accepted with some comments: All though this may sound gross please screenshot the message that contained the NSFW content to verify the punishment was correct

Someone spam pings a user, what do you do? *

An instant ban would be needed for that

Staff comment: You do not instantly ban a user for spam that would be a 1h-3d mute

~~If someone is being completely toxic towards other people. How do you approach the situation? *~~

I would ask "Why are you being toxic?" and if it wasn't a reasonable reason then I would mute them

Staff Comment: This question is still accepted but please specify how long you would mute them for your interview if you are accepted

✓ A mod is being toxic/abusive. What do you do? *

Tell them "Can you please stop?" and if they dont report it to a person with higher power

~~Someone is making racist, sexist, homophobic, etc. comments? What do you do? *~~

It depends on how bad the it is, like if they said something really offensive or the n-word then an instant ban but if it was something like GAYS ARE DISGUSTING then i would mute them for a week or two

Staff comment: If they say "Gays are disgusting" or something like that you should warn them and if it happens again mute them for 3 days

~~If someone is breaking rules in a voice channel; Such as ASMR and playing audio through the mic. How do you approach the situation? *~~

I would mute them for a day to a week depending on the noise of the audio or how long the ASMR has been going for

Staff Comment: You would warn them first before Softmuting them from the Voice channels
